Subject: SleepSafe Beds® and the Jenx® Dreama: 24 Hour Positioning System

SleepSafeBed.com

Dear DME Professional,

Attached is your requested quote for a SleepSafe Bed® that will contain the Jenx: Dreama™ System, or a Jenx: Dreama™ System as a retrofit for an existing bed in the field. In either case, the Dreama™ System needs to be prepared at to our factory to ensure a proper fit.

When ordering the Jenx: Dreama™: System with a new bed, provide Adaptive Imports with our Sales Order or Quote number to reference the bed to the system. The system will ship directly to SleepSafe® Beds for installation.

When ordering the Jenx: Dreama™: System to retrofit to an existing bed, you will get at “Parts” quote from us. We will need the Serial Number for the bed to identify the type of foundation for the “RETRO KIT” and provide the quote number to Adaptive Imports for ordering. The system will ship directly to SleepSafe® Beds for modification. We will then ship the “RETRO KIT” and instructions to you for further installation.

- Any accessories ordered for the Jenx® Dreama: 24 Hour Positioning System will be shipped directly to you, the DME.
- Only a SleepSafe® Twin size bed (any model) will accommodate the Jenx® Dreama: 24 Hour Positioning System.
- Any foundation can be used with the system; however, a hi-lo foundation will make it *easier* to add and remove any postural support accessories by raising the foundation above the side panel.
- In lieu of our mattress, SleepSafe® Beds will provide a custom foundation pad specially designed for the Jenx® Dreama: 24 Hour Positioning System. The pad is secured to the system with an 8-foot black cinch strap. There are no additional installation costs.
- The Jenx® Dreama: 24 Hour Positioning System is compatible with a padded or non-padded bed.

Please call with any questions or concerns. We value your input and your business!

Sincerely,

SleepSafe® Beds
